

THE COMPANY

IDROBASE®

INNOVATIVE
PRESSURE WASHERS

www.idrobase.com

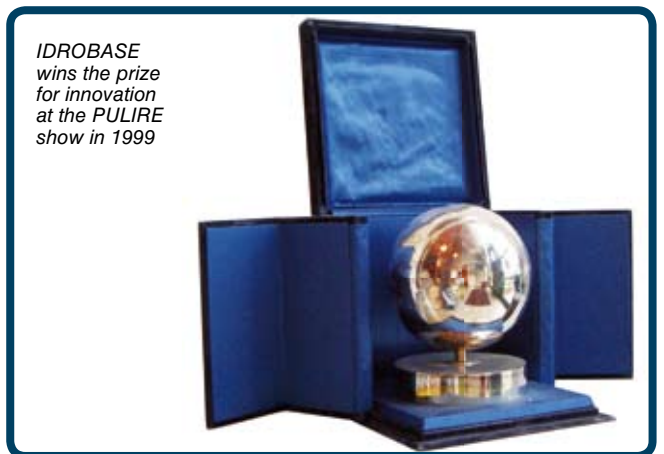

Who we are

In Idrobase we produce innovative h.p. washers for industrial and professional use. In our premises we take for granted that the relation between quality and price of our production has to be as high as possible.

We focus our attention on important aspects such as:

- Reliability
- Easy and simple to use
- Less maintenance and easy service
- Health, safety and comfort for the operator of our h.p. washers
- Reduction of time for cleaning
- Impact on the environment during and after the life of the h.p. washer
- Saving of resources

IDROBASE wins the prize for innovation at the PULIRE show in 1999

Our high pressure washers

Strong, simple, durable and safe. Pump easily visible, engine that "breathes" air directly from outside, simple control panel, high-efficiency heating system, nothing unnecessary, strong supporting tubular frame made of chromed steel, covers made of thermodynamic polystyrene only where necessary.
